PROFILE

Experienced Web Developer with 5 years experience. My current stack is Vue and Typescript. But also I have commercial experience with React and Angular. Also familiar with Svelte.

EMPLOYMENT HISTORY

Senior FE Developer at Skilld
November 2023 — Present

CRM system for pharmaceutical companies. Front-end was written on Vue 2 (we migrated to next version), VUEX (migrated to Pinia). My responsibility here are migration and developing new features, mentoring Juniors.

Senior FE Developer at Textmagic
November 2022 — November 2023

Tickets managment system written on front-end side, using Inversify, Vue 3 and Typescript. Was responsable for feature (tickets itself).

Frontend-Developer/Senior FE Developer at Onereach.io
July 2022 — November 2022

Project that allow customers provide chat bots in their web sites. Was written on Vue 2 and Vuex. I implemented features (custom elements, widgets, etc).

Frontend-Developer/Senior FE Developer at SoftServe, Dnipro
April 2019 — July 2022

Work as FE dev on several projects and clients. It was like huge enterprise level application for consulting and medical companies and small few-month duration projects with small team. With different frameworks and technologies (Angulat, React, Vue).

- Series of projects for Deloitte. Stack - **Angular, NgRx, agGrid**. Implement features, maitaining dashboards, guards and shared components.

- Medical project for Henry Schein. Stack - **Vue2, Vuex, Vutify**. Implement dental chart with svg, custom text editor, common stuff like forms, routing, shared components, etc. Was mentor for trainee.

- Nova (https://github.com/solarwinds/nova). **Angular** framework with open code. Working on improving accessibility and docs.

- Project for SolarWinds. Stack - **React** and **Semantic UI, Jest.** Common stuff as fe dev - components, features, testing. Documenting shared components, using **Storybook**.

- Project for Dyson. Stack - **Vue3** + **Vuex.** Implement project from the scratch to end.

- Project for Eventus. **Angular** + **NgRx** (partially, trying to avoid it on project). Dashboards, features, forms, creating custom components, etc.

Front-End Developer at Source Angel, Dnipro
April 2018 — April 2019

Work as front-end developer on several projects. Mainly on Angular also create markup for other clients.

- pwa application for weight loss program. Team - 4 people. Stack - **Angular** and **Firebase**. Implement graphs, using googleCharts, features (forms, guards);

- Markup (client - transwestern). Implement markups on native html and css;

Student/Intern at Epam, Dnipro
July 2017 — June 2018

Pass Epam Front-End Developer program. Main stakc was Angular 2 + Typescript. Working on quiz generator project.

- implement reactive forms, custom form control elements, validators;

- implements guards;
